Cape Eleuthera Resort & Marina Crowned the Hottest Dive Resort in the Caribbean by Caribbean Journal

ELEUTHERA, Bahamas – Cape Eleuthera Resort & Marina has been spotlighted as **the hottest dive resort in the Caribbean right now** in a major new feature published today by the leading authority on Caribbean travel, *Caribbean Journal*.

In the article “These 20 Dive Resorts Are Perfect for an Underwater Caribbean Vacation,” published November 20, 2025, *Caribbean Journal* highlights the region’s top properties that are redefining dive travel. Among an elite list of 20 standout resorts across the Caribbean, Cape Eleuthera stands out as the premier choice for serious divers seeking unparalleled underwater adventure combined with serene above-water luxury.

Writer Karen Udler praises the resort’s prime location on the far southern tip of Eleuthera, stating:

“On the far southern point of Eleuthera, **Cape Eleuthera has emerged as the hottest dive resort in the Caribbean right now**. The location gives scuba divers access to dramatic walls, reef clusters and less-traveled sites you won’t find on the main island circuits. The recently-transformed dive operation is built around small groups and precise planning, pairing deep-water exploration with the resort’s marina, villas and quiet beaches that make the downtime feel equally compelling.”

Divers at Cape Eleuthera enjoy exclusive access to breathtaking drop-offs where the Atlantic meets the Caribbean, thriving reef systems, and remote sites rarely visited by others. The resort’s upgraded dive center emphasizes intimate group sizes, expert guidance, dive boats, and a seamless blend of adventure and relaxation—making it the ultimate home base for travelers who live for the underwater experience.

“This recognition from *Caribbean Journal* confirms what our guests have been telling us: Cape Eleuthera offers something truly unique in the Caribbean dive world,” said a spokesperson for Cape Eleuthera Resort & Marina. “We’re thrilled to be named the hottest dive destination in the region and invite divers from around the globe to discover why Eleuthera’s southern edge is the new epicenter of Caribbean scuba.”
